

S.N.: 10/798,815  
Art Unit: 2878

**AMENDMENTS TO THE SPECIFICATION:**

Replace the paragraph at page 14, beginning at line 5 (through line 13), with the following amended paragraph:

A system for displaying an image captured by a sensor array reduces physical movement of the camera. The system includes means for displaying an image corresponding to an output from a plurality of sensors within a first area of a sensor array and means for changing the image displayed by translating the first area within the sensor array as by changing the grouping of the sensors whose image data is displayed.
